What To Do Today - Quick Start Guide

A focused two-hour reset followed by a seven-day and 30-day execution plan.

MATRIX REPROGRAMMED - DETAILED WEALTH GUIDE

Reader outcome: Complete the essential financial snapshot, one income action, one leakage action and a scheduled review.

Best for: A reader overwhelmed by money decisions who needs a safe sequence of concrete actions today.

Edition checked: 2026-08-01

Educational information only. No personalised financial, investment, legal or tax advice. No guaranteed outcomes.

CONTENTS

1. First 15 minutes - protect access

[ ] Confirm access to primary bank, email and phone accounts.
[ ] Enable multi-factor authentication where available.
[ ] Check for unknown transactions or changed contact details.
[ ] Do not share passwords, one-time codes or remote access.
[ ] Write emergency bank and card contact routes from official sources.

2. Minutes 15-35 - cash snapshot

Write current cash, expected income before the next pay date and essential payments due.
List minimum debt payments and any arrears deadlines.
Calculate the amount available after essentials.
Do not rely on an available credit limit as cash.
If essentials cannot be covered, prioritise early contact with creditors and official support routes.

3. Minutes 35-55 - stop one leak

Open the last month of transactions and identify one unused or low-value recurring cost.
Cancel, pause or renegotiate through the documented route.
Record annual rather than monthly saving.
Do not cancel essential insurance or protection without understanding the risk and replacement timing.

4. Minutes 55-80 - choose one 90-day target

Choose one target: income increase, emergency reserve, debt reduction, business cash, investment setup or tax records.
Define the amount, deadline and reason.
Choose one weekly behaviour that directly affects the target.
Reject targets that depend mainly on market prediction or luck.

5. Minutes 80-105 - create one income action

Write one offer or employment request tied to a measurable result.
Name ten buyers, employers, partners or referrers.
Send the first three messages today.
Schedule the remaining seven contacts.
Record replies and objections instead of interpreting silence emotionally.

6. Minutes 105-120 - install the money review

Schedule a 30-minute monthly reconciliation and a longer annual review.
Create a folder for statements, tax records, contracts, insurance and investment documents.
Set one automatic transfer or debt payment that is affordable under the downside

6. Minutes 105-120 - install the money review (continued)

case.
Write the next review date and the evidence to collect before it.

7. Seven-day plan

Day 1: complete snapshot and access security.
Day 2: build debt and recurring-cost register.
Day 3: create income offer or career case.
Day 4: contact ten people.
Day 5: compare one bank, insurance, investment or business cost using official documents.
Day 6: organise tax and legal records.
Day 7: review results and choose the next constraint.

8. 30-day plan

Week 1: stabilise and secure.
Week 2: increase qualified income conversations.
Week 3: complete one paid test, salary discussion or cost recovery.
Week 4: automate the reserve and document the next stage.

[ ] Cash gap reduced.

[ ] Leakage recovered.

[ ] Income action completed.

[ ] Reserve or debt milestone completed.

9. Do not do today

Do not open a leveraged trading account because of urgency.
Do not transfer money to an unverified adviser or recovery firm.
Do not create a company or trust solely from a social-media tax claim.
Do not buy inventory before validating demand and landed cost.
Do not cancel protection or default silently when an early conversation may create options.

10. Quick-start record

[ ] Essential monthly cost.

[ ] Cash available.

[ ] Debt priority.

[ ] Leak stopped.

[ ] 90-day target.

[ ] First three contacts.

[ ] Automatic action.

[ ] Next review date.

11. How to use this guide

Purpose: Complete the essential financial snapshot, one income action, one leakage action and a scheduled review.
Best reader: A reader overwhelmed by money decisions who needs a safe sequence of concrete actions today.
Read the guide once without taking action. On the second pass, complete the checklists and write down the evidence supporting each decision.
Replace every example number with your own verified amount, date, fee, tax treatment, contract term or source document.
Do not treat a checklist tick as proof. Keep copies of the underlying statements, quotations, filings, contracts and calculations.
For major decisions, use this guide to prepare better questions for a regulated adviser, accountant, lawyer, lender or insurer.

12. Evidence standard

Tier 1: law, regulator, tax authority, court, audited accounts, official product document or signed contract.
Tier 2: recognised institutional research that states its methodology, date and limitations.
Tier 3: reputable reporting used to identify questions, not to replace primary evidence.
Tier 4: marketing, social posts, testimonials, screenshots and anonymous claims. Treat these as unverified leads.
Write the source date beside every changing figure. A correct figure without a date can become misleading.
Separate facts, estimates, assumptions and scenarios. Never allow a scenario to be presented as a forecast or guarantee.
A company, fund, adviser, trust, structure, transaction or association is not proof of misconduct.

13. Decision record worksheet

[ ] State the decision in one sentence.
[ ] State the desired result and deadline.
[ ] List the three strongest pieces of supporting evidence.
[ ] List the three strongest reasons the decision may fail.
[ ] Record the maximum acceptable loss of money, time and flexibility.
[ ] Record the smallest reversible test.
[ ] Name the person responsible for checking legal, tax or regulatory consequences.
[ ] Set the next review date and the evidence that would cause you to stop.

14. Professional advice triggers

Seek regulated investment advice when product suitability, risk capacity, pensions,

14. Professional advice triggers (continued)

insurance or a large portfolio decision is unclear.
Seek tax advice before changing residence, extracting company cash, transferring assets, using trusts, gifting substantial sums or entering cross-border arrangements.
Seek legal advice before signing guarantees, shareholder agreements, acquisition contracts, complex leases, loan security or beneficiary arrangements.
Seek accounting advice when turnover, VAT, payroll, inventory, multiple activities or company-group transactions become material.
Use a defined written question. Paying for broad reassurance without documents or calculations rarely produces a useful answer.

15. Subject focus map

Use the following subject anchors as named checkpoints. For each checkpoint, record the fact, source, date, assumption, decision and next review date.
FIRST 15 MINUTES: define what this checkpoint means for this guide, what evidence supports it, and what result would cause you to change course.
TWO-HOUR RESET: define what this checkpoint means for this guide, what evidence supports it, and what result would cause you to change course.
SEVEN-DAY PLAN: define what this checkpoint means for this guide, what evidence supports it, and what result would cause you to change course.
NEXT REVIEW: define what this checkpoint means for this guide, what evidence supports it, and what result would cause you to change course.
Do not mark a checkpoint complete because an action was taken. Mark it complete only when the result and supporting evidence have been recorded.
Where a checkpoint depends on another person, institution, platform or contract, record that dependency and a fallback route.
Rank checkpoints by potential harm if ignored, not by how interesting or easy they appear.
At the end of each review, choose one checkpoint to advance and one risk to reduce before adding a new objective.

16. Worked decision case

Write a real decision from your own situation at the top of a blank page. Examples include changing work, launching an offer, choosing an account, buying an asset, restructuring a business or rejecting a proposal.
Baseline: state the current cash, income, liabilities, commitments, ownership, legal position and time available. Use documents rather than memory where possible.
Desired result: describe the measurable outcome, deadline and reason. Remove vague language such as more, better, passive, safe or guaranteed.
Options: include the proposed action, a smaller reversible test, a diversified alternative, delaying the action and doing nothing.
Evidence: attach at least three independent sources. Identify which evidence is official, contractual, audited, estimated, promotional or missing.

16. Worked decision case (continued)

Economics: show setup cost, recurring cost, cash timing, fees, tax reserve, downside loss, opportunity cost and the point at which the decision becomes worthwhile.
Risk: identify concentration, liquidity, legal, operational, fraud, health, relationship and behavioural risks. Name the risk that could create irreversible harm.
Professional review: write the exact question that requires an accountant, lawyer, regulated adviser, lender, insurer or technical specialist.
Decision: state proceed, test, delay or reject. Record the maximum commitment and the evidence required before any further commitment.
Review: set a dated checkpoint. Write the result that would confirm the decision, the result that would require adjustment and the result that would trigger an immediate stop.

17. 90-day implementation workbook

Week 1 - Establish the baseline. Reconcile the relevant accounts, contracts, statements, fees, tax records, responsibilities and deadlines.
Week 2 - Define the result. Choose one measurable outcome and remove actions that do not directly support it or protect an essential risk.
Week 3 - Gather primary evidence. Use official registers, filings, signed terms, current quotations and dated institutional data.
Week 4 - Compare alternatives. Include a lower-cost option, a lower-risk option, a reversible test and the option to wait.
Week 5 - Model the economics. Build downside, base and upside cases while treating every uncertain input as an assumption.
Week 6 - Verify identity and authority. Confirm who owns, controls, advises, holds money, signs contracts and bears liability.
Week 7 - Run the smallest useful test. Limit money, time and legal commitment while collecting evidence about real demand or performance.
Week 8 - Reconcile actual results. Compare promised, expected and actual cost, time, cash flow, quality, risk and customer or counterparty behaviour.
Week 9 - Repair the constraint. Improve the single factor currently limiting income, retention, safety, liquidity, delivery or evidence quality.
Week 10 - Install controls. Add calendar reminders, approval limits, account separation, written procedures, backups and review ownership.
Week 11 - Decide whether to scale. Increase commitment only when the test produced measurable value and the downside remains affordable.
Week 12 - Complete the evidence file. Store the decision record, sources, calculations, contracts, results, lessons and next review date.
Day 90 - Write a one-page conclusion: what was established, what remains uncertain, what changed, what will continue and what will stop.

18. Review, escalation and stop rules

Review monthly when the decision affects recurring cash, debt, customer commitments,

18. Review, escalation and stop rules (continued)

investment contributions or essential protection.
Review immediately after a material legal change, tax notice, contract change, security incident, missed payment, large loss, health event or relationship change.
Escalate to a qualified professional when the facts cross jurisdictions, involve regulated products, create personal guarantees, affect beneficiaries or cannot be reversed cheaply.
Pause when required documents are missing, identities cannot be independently verified, costs are unclear or the counterparty resists reasonable due diligence.
Stop when the action requires deception, undeclared income, false invoices, hidden beneficial ownership, unaffordable leverage or essential-living money.
Stop when actual cash use, delivery time or loss exceeds the written limit.
Stop when the central evidence is corrected, withdrawn, contradicted by a stronger source or no longer current.
Do not move a stop limit merely because money, pride or time has already been committed. Sunk cost is not evidence that continuing is rational.
Record every exception to the plan, who approved it and why. Repeated exceptions indicate the plan or control is not working.
A stopped action can still be a successful decision when it prevents a larger loss and preserves the ability to act later.

19. Evidence and legal boundary

This is educational information, not personalised financial, investment, legal, accounting or tax advice.
Investments can fall in value. Businesses can fail. Debt, leverage, illiquidity, tax and legal obligations can create losses greater than the expected benefit.
Rules and thresholds change. Verify the current official position on the date of action.
Never use false invoices, hidden ownership, undeclared income, sham transactions, misleading applications or borrowed essential-living money.
No return, saving, valuation, tax outcome or business result is guaranteed.
