Strongest analytical inference: The indexed set contains 70 relationship, ownership, access, meeting, funding or contract indicators that justify a structured network map.
- ITEM 03**

Most important unresolved question: Coverage is limited to indexed sources available during this controlled build.
- ITEM 04**

Leading speculative hypothesis: Some documented relationships may form a more structured access, facilitation or protection network than the released public record presently explains.
- ITEM 05**

Evidence needed: Unredacted correspondence, authenticated bank records, visitor logs, contracts, communications metadata, sworn testimony, ownership records and full court exhibits.
- ITEM 06**

This report does not prove guilt, criminal conduct, intelligence control or coordinated wrongdoing merely from association.
