WHAT THE RECORD CAN SUPPORT

- The difference between primary source, public reporting, archive lead, claim, and speculation.
- How corrections, privacy, and trust pages protect the reader and the site.
- How to judge whether a page is making a claim or asking a research question.
- Which evidence vault route to open when a number or allegation matters.
- This brief supports reader orientation, evidence routing, public download value, and next actions.

SPECULATION BOUNDARY

- This free brief does not increase evidence strength. Treat it as a route map until the linked source/evidence page supports a stronger claim.
- Speculation must remain labelled and separated from court records, official data, documented associations, and confirmed facts.
