Strongest analytical inference: The indexed set contains 71 relationship, ownership, access, meeting, funding or contract indicators that justify a structured network map.

ITEM 03

Most important unresolved question: Coverage is limited to indexed sources available during this controlled build.

ITEM 04

Leading speculative hypothesis: Some documented relationships may form a more structured access, facilitation or protection network than the released public record presently explains.

ITEM 05

Evidence needed: Unredacted correspondence, authenticated bank records, visitor logs, contracts, communications metadata, sworn testimony, ownership records and full court exhibits.

ITEM 06

This report does not prove guilt, criminal conduct, intelligence control or coordinated wrongdoing merely from association.
